

# NATIONAL PARK GESÄUSE APP

A National Park goes smart

Markus Blank

# Technology vs Nature?

## LIFE IN THE WOODS

For the visitors experience

# IDEAS AND GOALS

# Project history

- **First project „XEISGUIDE“**
  - Dependent on hardware
  - Rental system
  - Static content
  - Poor response

- **Gesäuse App**
  - + Runs on every smartphone with Android or iOS
  - + Free of charge
  - + Available for a broad public
  - + Always up to date
  - Covers the most important needs of a visitor!

**What does a visitor need?**

# Basic questions of visitors

**Where am I?**

→ Interactive map

**What can I do?**

→ Experience-portal

**Do I already know?**

→ Knowledge base

**What helps me?**

→ Innovative toolbox

**How to get there?**

→ Tools for soft mobility

For an innovative visitor information

# CORE ELEMENTS

# Zeit für Natur

NATIONALPARK  
GESÄUSE

## Karte

Wo bin Ich ?

A circular menu with a central blue button labeled "Start". Surrounding the center are four green icons: a map, a person with a backpack, a person with a camera, and a person with binoculars. The menu is set against a light grey background with a subtle mountain range silhouette.

Where am I?

# Core Element Map

- Cartographic material
  - Smartphone adapted
  - High-contrast
  - Clearly legible

- Interactive:
  - Points of Interest (POI)
  - Current position
  - Augmented Reality

What can I do?

# Core Element Experience

- Up-to-date recreational activities
- Visitor guidance

- National Park activities
- Visitors Center
- Hiking Tours
- Calendar of Events
- Thematic trails
- For Children
- Barrier-free
- ...

Do I already know?

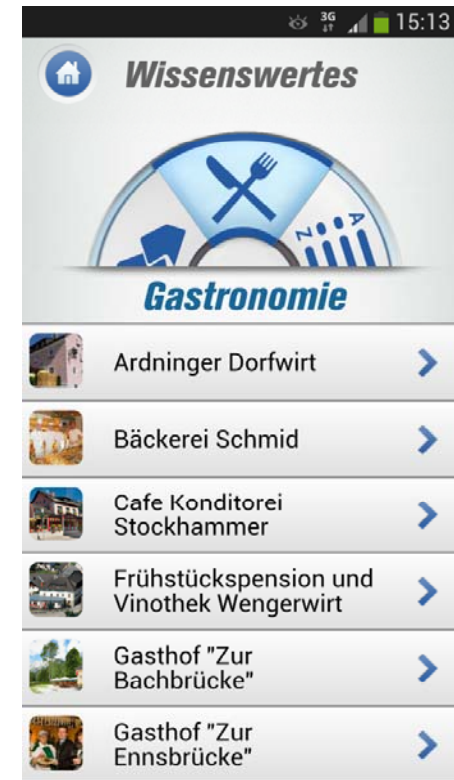

# Core Element Information

- Visitors service
- Visitors information

- Gastronomy
- Accommodations
- Alpine huts
- Region
- National Park
- ...

How to get there?

# Core Element Mobility

- Visitors information
- Awareness raising
- Booking platform
- Decrease of individual travel

- Booking system for taxi
- Booking system for shuttle
- E-Scooter availability
- Public transport
- ...

# Self organizing dispatch system for transport providers

## Shared Taxi

Frontend

pickup, dropoff, time

Time, combined travel

Backend

What helps me?

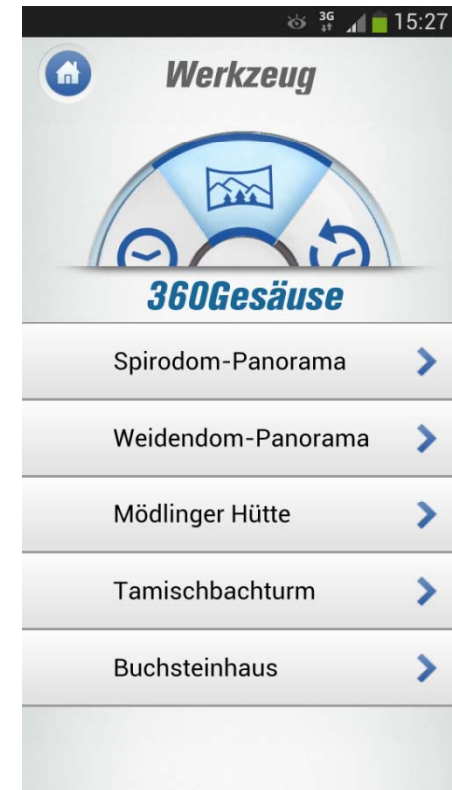

# Core Element Toolbox

- Visitors service
- Based on FAQs
- Augmented Reality

- 360Gesäuse
- Time machine
- Virtual National Park
- ...

# 360Gesäuse

- 360° panoramic views for different locations
- Peak finder

# 360Gesäuse

- Get active and align the panorama with the live picture

# Time machine

- Old pictures at different locations
- Travel back in time

# Time machine

- Get active and align the past with the present
- Take a picture, add it to the gallery and show it to others

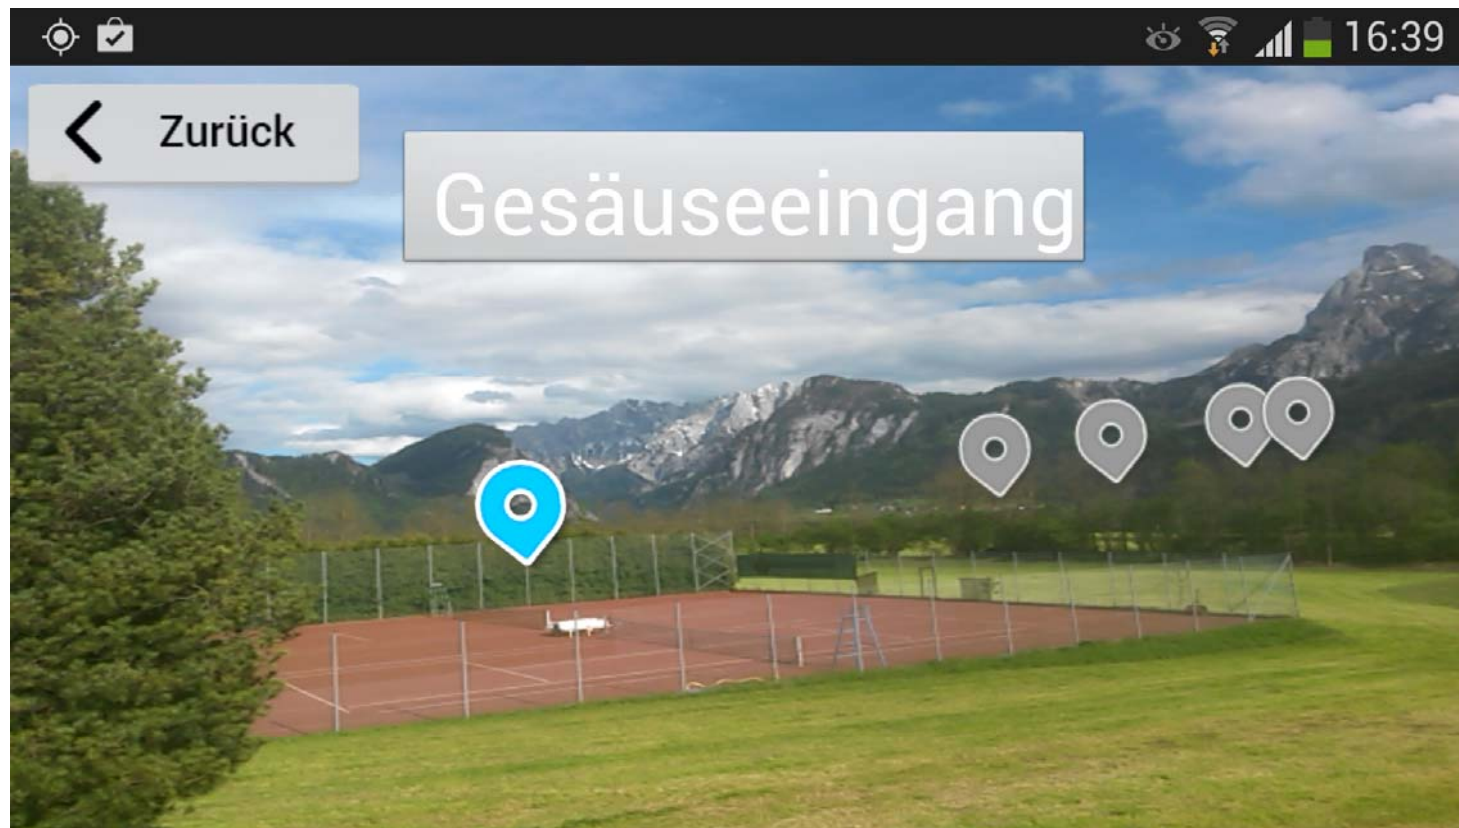

# Virtual National Park

- Find close POIs wherever you are in the National Park

For the future

# CONCLUSION AND OUTLOOK

## Lessons Learned

- More complex than expected
- More time intensive than expected
- Especially booking platform and AR

# Outlook

- Conversion to iOS
- English version
- Intensive bugfixing
- Marketing
- More functions
  - Thematic trails with AR
  - Message to the National Park
