

Short résumé about the course organizer

I (Andreas Dahlin) am responsible for this course. I am an adjunct professor (docent) in Analytical Chemistry from Uppsala University. However, I have always been interested in presenting my research and that of my colleagues with clear, pedagogical images. In 2011, a friend of mine convinced me to develop a PhD-course in how to make better images and posters. The course, which is called Visualize your Science, quickly became very popular among PhD-students. At the beginning of 2016, I decided to focus entirely on helping researchers create better images and I quit my research career to start the company Visualize your Science AB. Last year we gave the course to around 450 PhDs, mainly in the Nordic countries. Now we are also three (Andreas Dahlin, Kess Marks and Mads Luchow) teachers in the course with expertise in different software, to ensure you get the best possible help with your visuals.

If you have any questions regarding the course, you can contact me directly by e-mail at Andreas.dahlin@visualizeyourscience.com or phone at 0707 468 144.
