

Short résumé about the course organizer

I (Andreas Dahlin) am responsible for this course. I am an adjunct professor (docent) in Analytical Chemistry from Uppsala University. However, I have always been interested in presenting my research and that of my colleagues with clear, pedagogical images. In 2011, a friend of mine convinced me to develop a PhD-course in how to make better images and posters. The course, which is called Visualize your Science, quickly became very popular among PhD-students. At the beginning of 2016, I decided to focus entirely on helping researchers create better images and I quit my research career to start the company Visualize your Science AB. Last year I gave the course to around 250 PhDs, mainly in the Nordic countries.

If you have any questions regarding the course, you can contact me directly by e-mail at Andreas.dahlin@visualizeyourscience.com or phone at 0707 468 144.
