

MOLECULAR IDENTIFICATION OF SPECIES AND COMMUNITIES

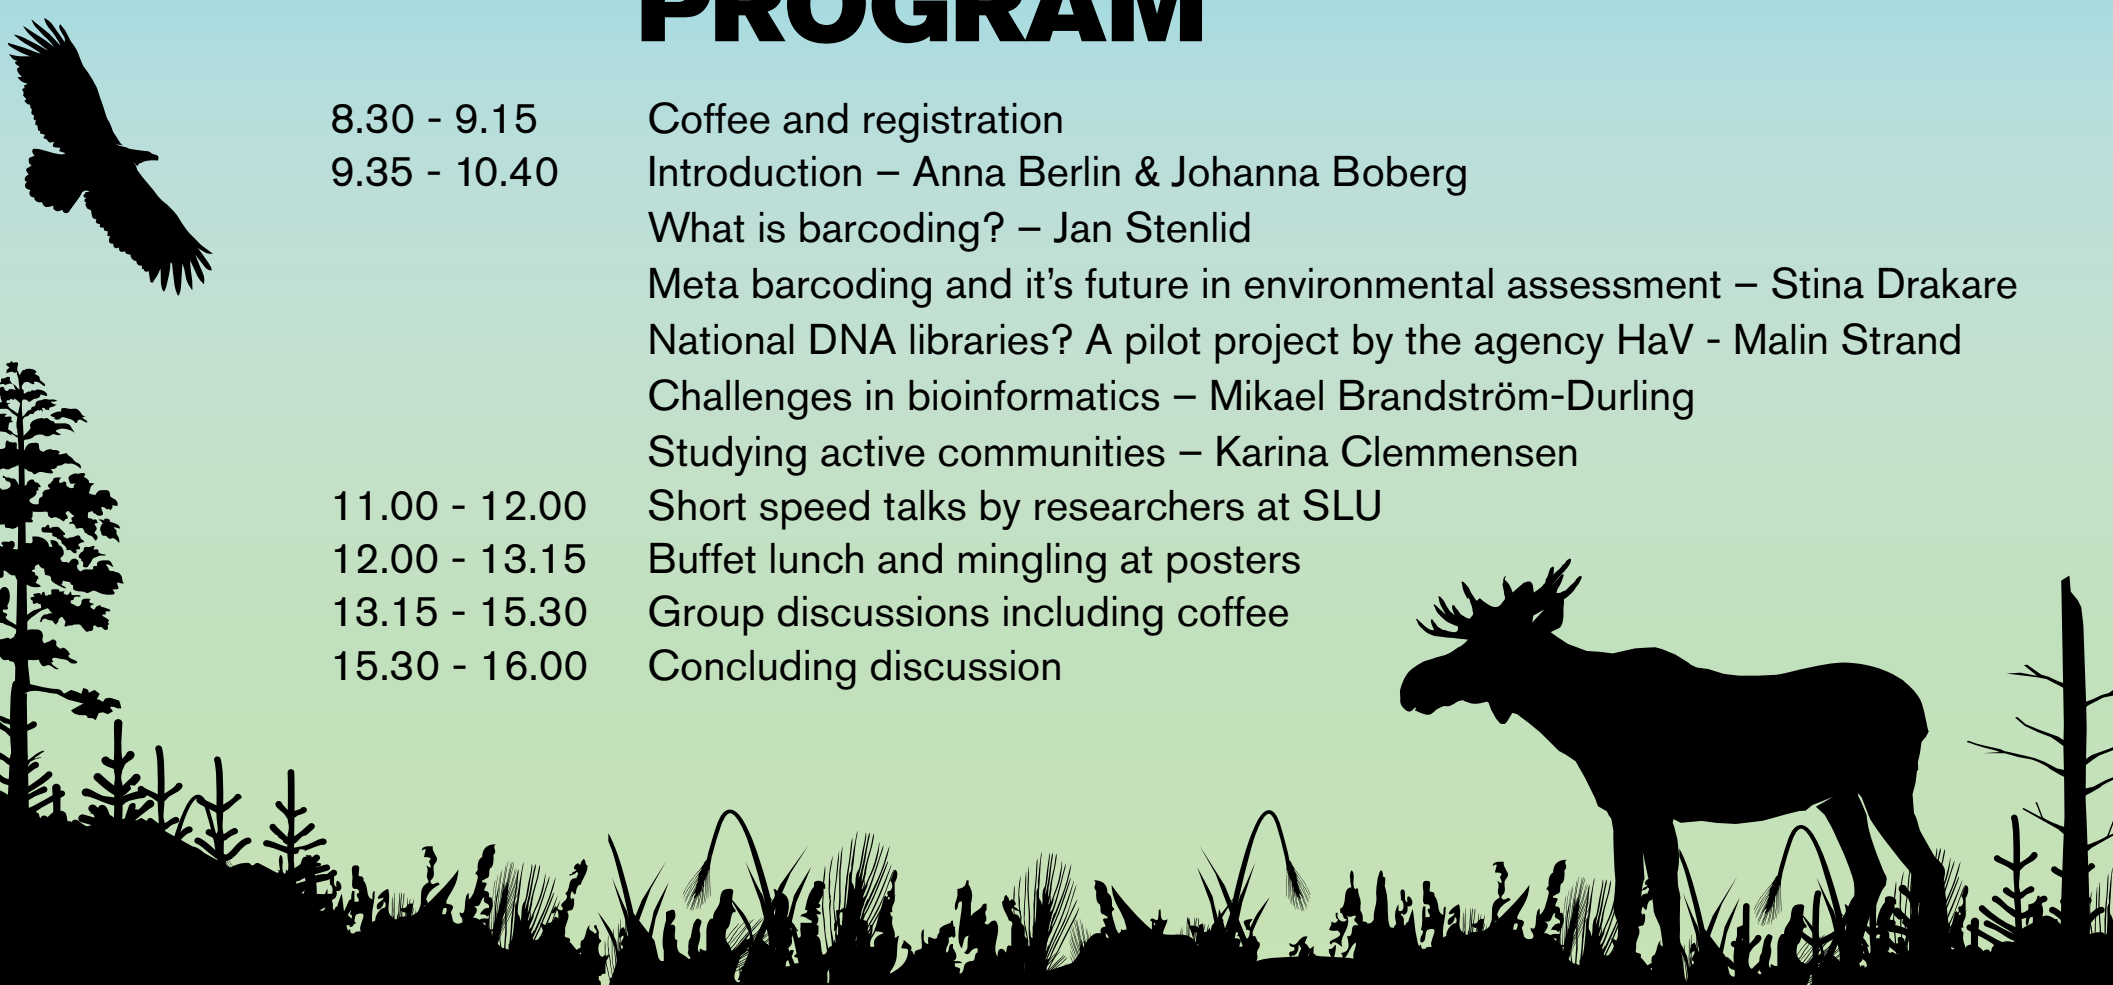

DNA barcoding for research and environmental monitoring and assessment

Welcome to a workshop on barcoding at the Biocenter at Ultuna in Uppsala!

We want to gather researchers and stakeholders, interested in molecular identification of species and communities, in order to meet and exchange experience between different subject areas.

PROGRAM

8.30 - 9.15	Coffee and registration
9.35 - 10.40	Introduction – Anna Berlin & Johanna Boberg
	What is barcoding? – Jan Stenlid
	Meta barcoding and it's future in environmental assessment – Stina Drakare
	National DNA libraries? A pilot project by the agency HaV - Malin Strand
	Challenges in bioinformatics – Mikael Brandström-Durling
	Studying active communities – Karina Clemmensen
11.00 - 12.00	Short speed talks by researchers at SLU
12.00 - 13.15	Buffet lunch and mingling at posters
13.15 - 15.30	Group discussions including coffee
15.30 - 16.00	Concluding discussion
