Research request to the Swedish Livestock Research Centre

The Swedish Livestock Research Centre offers housing for research and teaching. There are facilities for dairy cattle, pigs and poultry. Please fill out this application form in order to make a request for a research project. Based on your application the research coordinators and stable foreman can address the needs in the research enquiry and come up with suggestions for its implementation and make a cost estimate for the research project.

Aim of the study:

Your application will be handled by our research coordinators who will return to you with a cost estimate and comments. Send your application form to this e-mail address: forskning-vh-ladugard@slu.se

The information registered in this form will be processed by SLU. In order to make a decision in regards to your application for animal trials, SLU needs to process your personal data. You can read more about how SLU processes personal data at www.slu.se/personuppgifter

Yes, I understand that the data about me in connection with this application is stored and processed.

YES

Short description of the project

Animals required (number and group size)

Feed requirements

Housing requirements and requirements for research equipment

Data to be recorded and at which intervals

State if electronic equipment (for instance extra cameras, monitors, computers and other measuring devices) will be used and if any part of the equipment needs to be connected to the SLU network.
All equipment must be CE-marked and fulfill all requirements necessary for the environment, in which it will be placed. Equipment placed in the animal facilities must fulfil applicable requirements in LBK.

State if electronic equipment such as extra cameras, screens, computers or other surveillance equipment will be used and if any part of the equipment needs to be connected to the SLU network.
All equipment must be CE-marked and fulfill all requirements necessary for the environment, in which it will be placed. Equipment placed in the animal facilities must fulfil applicable requirements in LBK.

State if other technological or chemical equipment such as gas bottles will be used in the project and if there are special routines around care and handling. *All equipment must be CE-marked and fulfill all requirements necessary for the environment, in which it will be placed. Equipment placed in the animal facilities must fulfil applicable requirements in LBK.*

Date for project start including acclimatization period.

Date for project completion and state date when the animals are free to be moved to other areas in the stable.
