

Efternamn	Förnamn	Institution	Titel	2020	2021	2022	Totalt
Bergqvist	Ann-Sofi	Kliniska vetenskaper	Intermittent suckling to decrease piglet mortality and increase piglet growth	441 000	378 000	367 000	1 186 000
Carton	Nicolas	Biosystem och teknologi	Species mixtures and varietal choice to prevent soil-borne diseases in grain legumes	810 000	766 000	776 000	2 352 000
Engström	Lena	Mark och miljö	Nitrogen strategies in organic milling winter wheat	598 000	688 000	739 000	2 025 000
Eriksson	Torsten	Husdjurens utfodring och vård	The organic dairy farm as a carbon sink – added value from biochar	904 500	955 600	594 200	2 454 300
Gonda	Horacio	Husdjurens utfodring och vård	Improving pasture utilization by using the natural variation in cows' grazing behavior and herbage nutrient content	971 500	730 700	378 400	2 080 600
Hansson	David	Biosystem och teknologi	Effective weed control and increased carbon sequestration through strip-till establishment of organic field crops in withered cover crops	341 500	1 189 900	1 166 800	2 698 200
Menegat	Alexander	Växtproduktionsekologi	Facilitating reduced- and no-tillage organic grain legume production systems through integration of cover crop mulch for weed control	203 000	550 000	746 000	1 499 000
Wallenbeck	Anna	Husdjurens miljö och hälsa	Improved welfare of organic pigs and cattle at slaughter - evaluation and development of animal welfare indicators and their association to meat quality	1 074 000	871 000	370 000	2 315 000
Wallenhammar	Ann-Charlotte	Växtproduktionsekologi	Increased nitrogen availability and biodiversity in winter oilseed rape by intercropping annual frost sensitive legume plants	563 800	687 200	740 800	1 991 800
Viketoft	Maria	Ekologi	Flower strips 2.0: Optimized biological control and pollination in organic strawberries	0	857 300	514 500	1 371 800
