

CirkuLärCentrum Ultuna: Centre for Circular Urban Food System Studies

Name: Daniel Bergquist

Department: Department of Urban and Rural Development (SOL)

Faculty: Faculty of Natural Resources and Agricultural Sciences (NJ)

Contact: daniel.bergquist@slu.se

PROJECT SUMMARY

The long-term objective is to establish a center for research, development, and demonstration of circular food production in urban contexts, by integrating research, teaching, and collaboration in Ultuna to a larger extent. A central starting point is local and circular solutions for sustainable energy and food production in the city; by taking advantage of resource flows, competencies and activities in the Ultuna area, we want to create synergies with the expansive urban development now taking place in Uppsala, by creating a living laboratory for new research and collaboration for sustainable urban development from an energy and food perspective.

ACTIVITIES

Startup meeting in 2018, stakeholder workshop in March 2019 to establish partner consortium, and application writing, spring 2019.
