

Integrating IPM technologies in future crop protection

Mukesh Dubey

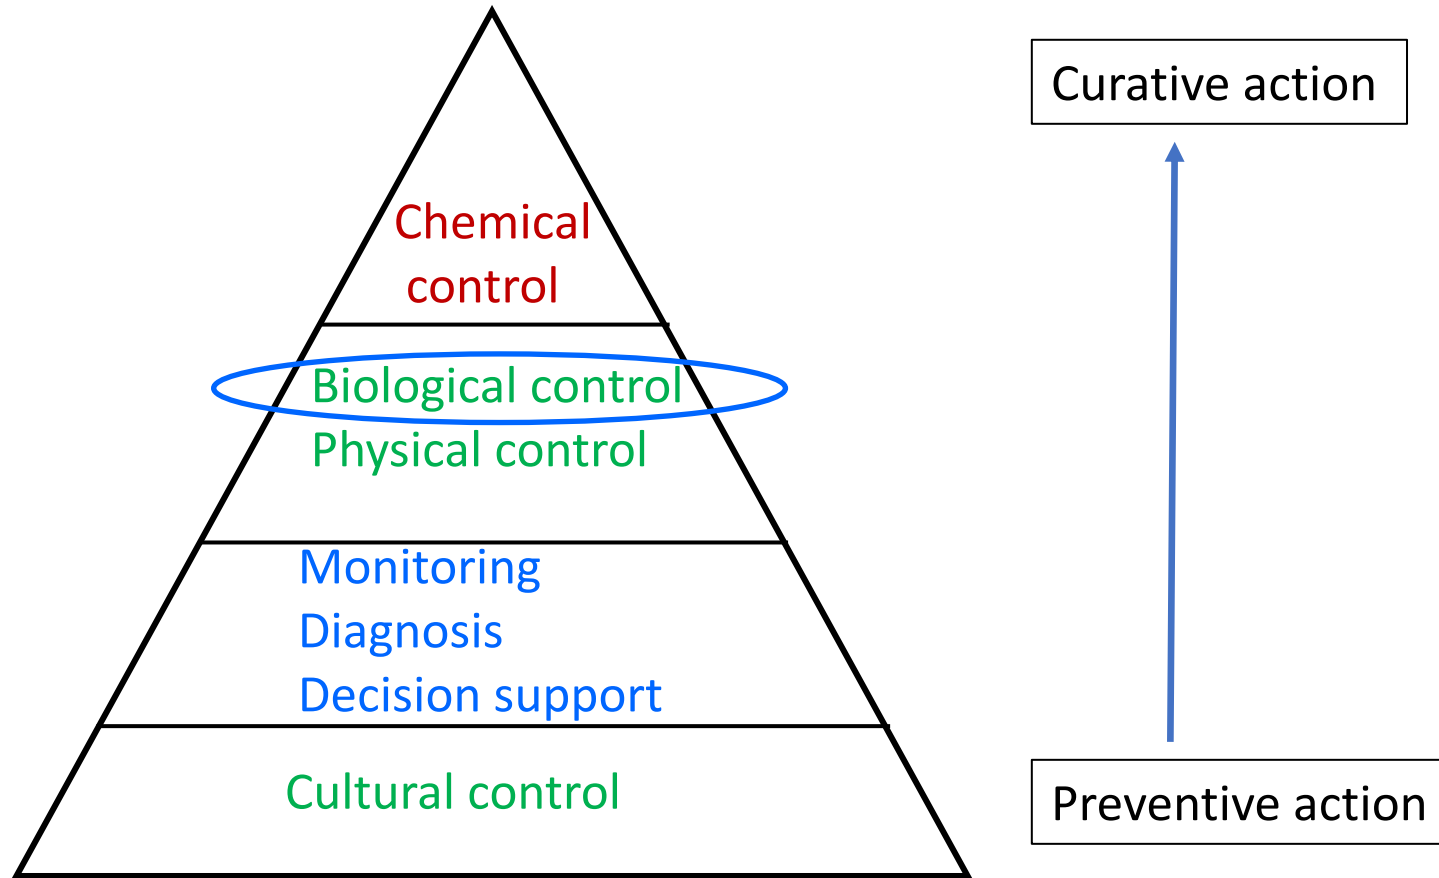

Docent

Department of Forest Mycology and Plant Pathology

Swedish University of Agricultural Sciences (SLU)

Uppsala, Sweden

Integrated Pest Management (IPM)

Overall Goal:

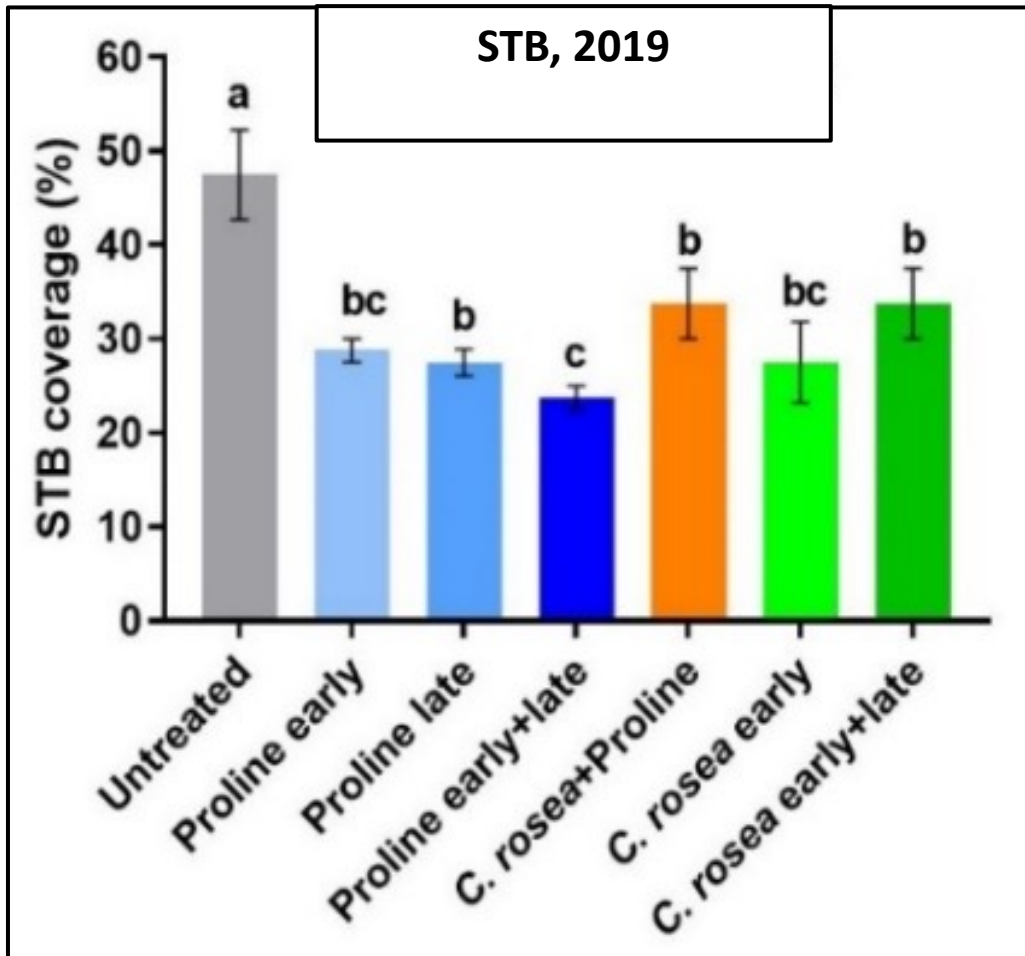

- Harnessing microbes for plant health promotion thereby better crop yield.
- Reducing the use of chemical fertilizers and pesticides in agriculture.

IPM in wheat production: A case study

Lise Nistrup Jørgensen
Flakkebjerg research station, AU, Denmark

IPM in wheat production: A case study

Small steps can make a big difference

Generating *C. rosea* strains tolerant to Prothioconazole

Dubey et al. Unpublished

Generating *C. rosea* strains with higher mycoparasitic ability

Dubey et al. BMC microbiology
