AGREEMENT
20xx-xx-xx

Non-proliferation treaty with regard to data from the Swedish NFI

Background

Exact positions for permanent plots of the Swedish NFI are protected by secrecy pursuant to Chapter 24. Section 8 of the Publicity and Secrecy Act. The same holds for exact positions from temporary plots, for such data that have a potential to affect forest owners' potential to use their forests. Exact coordinates are stored in the NFI databases and are used for statistics production conducted by NFI staff.

The permanent plots were established in 1983-1987. During the period 2023-2027, the plots have been or will be measured for an 8th time.

Agreement

NN, who will carry out the project YY, on behalf of ZZ, where exact positions for NFI plots will be used for **DETAILED PURPOSE**, has been granted permission from the NFI steering group (PS-RT) to use exact positions for plots from the Swedish NFI.

Terms

When the project is completed, the positions may not be used in other projects without renewed permission. The positions must also not be delivered to parties outside the project or otherwise made available to unauthorized persons. Nor must it be possible to extract the exact positions via the product (s) that the project produces. Further, field visits to permanent sample plots are not allowed.

For SLU

For ZZ
