

## Prices for sample analyses and laboratory services

Prices listed in SEK represent a per sample cost.

### Laboratory assistance

Prices concern laboratory assistance per hour during experiments and analyses.

Laboratory assistance (per h)	900
-------------------------------	-----

### Metabolism

#### *Biochemical blood analyses*

Amino acids (20)*	
Blood volume (THB)*	
Free fatty acids*	
Glucose*	
Glycerol*	
Lactate*	
Xylose	2700

#### *Biochemical tissue analyses*

Amino acids (20)*	
ATP, ADP, AMP, IMP*	
Creatine phosphate, creatine*	
Enzymes (CS, HAD, HK, LDH)*	
Glycogen*	
Lactate*	

### Molecular biological/immunological analyses

ELISA*	
Immunohistochemistry*	
Confocal microscopy*	
RNA/DNA extraction*	
PCR/real time-PCR*	
SDS-PAGE/Western blot*	

\*Debited as laboratory assistance per hour.

Additional analyses can be performed on request (price on request).

Additional costs for consumables and chemicals may occur.

Reduced price on large quantities of samples as agreed.

## Morphology

Biopsy preparation	1500
Embedding of tissue (paraffin)	140
Tissue preparation for microscopy**	800
Tissue sectioning (paraffin)*	

### *Histochemical tissue analyses*

Muscle fiber typing and fiber areas*	
Muscle histology	3600

\*Debited as laboratory assistance per hour.

\*\* Actual cost for sending sampling material and organ containers, administration, dehydration as well as cost for organ destruction will be added.

Additional analyses can be performed on request (price on request).

Additional costs for consumables and chemicals may occur.

**Reduced price on large quantities of samples as agreed.**

## Sperm morphology

Boar semen	1150
Bull semen	1150
Dog semen	1150
Ram semen	1150
Stallion semen	1900
Cell analysis	600
Conc. determination (double)	700
Membrane integrity analysis*	

Results reported to the referring veterinarian (usually in writing). An additional fee of 400 SEK is added on request of rapid reply (within 2 days).

\*Debited as laboratory assistance per hour.
