

Here is the quick version of the instructions for installing Baltic ForBio.

1. Check that your system meets the following minimum system requirements. You'll need:

- Window 10.
- .Net Framework 4.6 or higher.

Note: The app installer can check to see if the framework exists, and if not, it can start to download the framework from internet and install it.

Or, you can manually download it following link: <https://www.microsoft.com/en-us/download/details.aspx?id=48130>

- Adobe Acrobat Reader.

2. Download Baltic ForBio and extract the archive to a folder on your computer.
3. Browser to the folder where Baltic ForBio was extracted and click on the setup file.
4. Follow the on-screen instructions to complete the process.
5. Start Baltic ForBio.

Choose one of the these ways to start Baltic ForBio:

- On your Windows desktop — Double-click the Baltic ForBio icon.
- Start > Baltic ForBio.
- Use Windows+R to display Run, input Baltic ForBio and tap OK.

Note:

You may see another **User Account Control** dialog box asking whether Baltic ForBio can make changes to your computer. This is normal for the first time you launch Baltic ForBio. Click on **Yes** to continue.
