THE DEPARTMENT OF URBAN AND RURAL DEVELOPMENT IN 2017

THE YEAR THAT PASSED

It was a very busy year—as expected at a large and vigorous department. We continued to expand and were at the end of 2017 close to 130 persons working here; pursuing education, research and external collaboration. A new unit joined the department in the summer: SLU Future Food, one of SLU's four Future Platforms.

During the last year four persons at the department achieved associate professorship, the defence of four doctoral dissertations took place, two licentiate theses were presented and several members of our staff received prestigious awards, including pedagogical prizes for high quality in education.

A lot of effort was put into writing the department plan for 2017–2020. The plan is for the whole department as well as its constituent divisions.

The change-of-generations continued among the higher positions and the department keeps developing in new and exciting directions. New subject chairs were appointed during the year and further changes are to come. At present there are seven subject chairs at the department with the longest serving chair in place for eight years.

The department's collaboration with surrounding society is far reaching. It is carried out as an important part of our research and education and through the work of the departmental units Swedish Centre for Nature Interpretation and SIDA Helpdesk for Environment and Climate Change. As part of our strategic development we aim to further strengthen our external collaboration and seize the experiences and knowledge developed in and through the collaboration processes that we are engaged in.

Last year's research applications resulted in over 25 million Swedish crowns in grants—a record. We have been working with ways of improving the support we give each other in the application process, which has been highlighted as a part of the success. We will continue working for more collegial support, integration across divisions and in improving our ways of working in 2018.

CALENDAR 2017

NA XIU. PHOTO: PER-ARNE KLASSON.

■ JANUARY 26

Na Xiu defends her doctoral thesis in landscape architecture: *Urban green networks: A socio-ecological framework for planning and design of green and blue spaces in Sweden and China.*

■ MARCH 9

Lotten Westberg gives her Associate Professor's (Docent) lecture in environmental communication: *The myth of knowledge transfer: Ineffective expectations on dialogue and cooperation for a more sustainable management of natural resources* (in Swedish).

Jesper Larsson gives his Associate Professor's (Docent) lecture in agrarian history: *To Own and Use Together* (in Swedish).

■ MARCH 10

Mats Höglund presents his licentiate thesis in agrarian history: *The struggle on 'Fredsmilen': Maps as tools for power and control in the reduction of 1655* (in Swedish).

■ MARCH 30

Clas Tollin, Researcher at the Division of Agrarian History, receives the Olaus Magnus medal—the finest award given by the Swedish Cartographic Society—for “[...] his long-standing and appreciated work with the geometric maps; recording, analysing and making them available, the oldest survey maps in Sweden”.

■ MARCH 31

At the annual inauguration ceremony Thomas Oles is officially installed in office as the new professor in landscape architecture–design theory. His inauguration lecture is entitled: *Why we need a landscape science.*

■ MAY 17-18

The department holds a two-day strategy conference at Julita in Södermanland.

CALENDAR 2017

GUSTAV BROMS, TO THE LEFT IN THE PICTURE, AND CECILIA NERMAN, TO THE RIGHT, AT THE AWARD CEREMONY. PHOTO: THOMAS NORRBY.

■ MAY 31

Two of our students are rewarded with The Annual Theses' Scholarship of Uppsala Municipality: Gustav Broms, student at the Agronomist-Rural Development program and Cecilia Nerman, student at the Landscape Architect program. Supervisors for the theses were Thomas Norrby and Kerstin Nordin.

■ JULY 1

SLU Future Food joins the department, a new strategic research platform that will be working within all faculties of SLU and in collaboration with relevant actors in society.

■ AUGUST 20

Associate Professor Lotten Westberg receives the Sustainability Science Best Paper Awards 2016—Outstanding article, for *The role of learning in transdisciplinary research: moving from a normative concept to an analytical tool through a practice-based approach*, published in Sustainability Science, Vol. 11(3).

■ AUGUST 29

An award ceremony is held for Maria Ignatieva, Project Manager for the LAWN project that resulted in SLU receiving the The Green Flag Award. Campus Ultuna is the first Swedish candidate to have the honor.

■ SEPTEMBER 1

Per Thunström presents his licentiate thesis in agrarian history: *The Tractors' Entry: Design, Production and Marketing during the Introduction period 1905–30*.

■ SEPTEMBER 15

Lisa Westholm defends her doctoral thesis in rural development: *Conserving carbon and gender relations? Gender perspectives on REDD+ and global climate policy*.

CALENDAR 2017

■ SEPTEMBER 18

The annual EIA Day (MKB-dagen), arranged by ESCRG—Environment and Sustainability Collaborative Research Group and moderated by Matthew Cashmore and Marie Kågström, researchers at the Division of Landscape Architecture.

PATRIK CRAS.
PHOTO: PER-ARNE KLASSON.

■ SEPTEMBER 26

Patrik Cras defends his doctoral thesis in rural development: *Rural Citizenship: A study of services and infrastructure organized in the intersection of the non-profit, the commercial and the political.*

■ OCTOBER 3

Linley Chiwona Karlton gives her Associate Professor's (Docent) Lecture in rural development: *A Cultural Ecology of Food Preference: "Same-same but different"*.

LINLEY CHIWONA KARLTUN.
PHOTO: JENNY SVENNÄS-GILLNER.

■ OCTOBER 7

At the annual conferment ceremony of doctoral degrees three of our staff members receive prestigious SLU awards.

JANKEN MYRDAL. PHOTO:
JENNY SVENNÄS-GILLNER.

CECILIA WALDENSTRÖM.
PHOTO: PER-ARNE KLASSON.

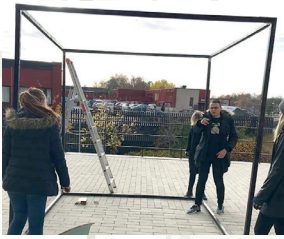

Janken Myrdal, Professor Emeritus in agrarian history, is awarded the major medal of honor for his "ground breaking research, substantial publication, for establishing one of Europe's largest divisions for research in agrarian history and receiving international awards and recognition". Cecilia Waldenström, Senior Lecturer in rural development, is awarded the gold medal, for "[...] major contribution in making rural development a vital and growing subject at SLU. [...] an important role in the recruitment processes for higher positions within the subject and the driving force in the development of two new popular educational programs".

Erica von Essen, Postdoctor in environmental communication, receives SLU's Individual Pedagogical Prize. The motivation for the prize is: "[...] appreciated for her ability to structure, engage and develop the students' learning. She is good at indentifying all students as individuals with their own strengths and implements this in her teaching. Erica is also appreciated for always giving immediate, and constructive feedback on the students' presentations". Translated excerpts from the motivations of all three awards.

CALENDAR 2017

LANDSCAPE ARCHITECT STUDENTS WORKING WITH THE PROJECT "THE STRUGGLE FOR SPACE", AND THE FINISHED INSTALLATION IN THE COURTYARD OF ULLS HUS. PHOTO: LINNEA ALVEBRINK & AGNES KYRÖ.

JENNY HÖCKERT OUTSIDE THE SLU BUILDING IN SKARA. PHOTO: YLVA CARLQVIST WÄRNBORG.

■ NOVEMBER 8

Opening of the exhibition of the design projects executed by second year students at the landscape architect program. It is a part of the celebration of the SLU's 40th anniversary. The students were given the task of rediscovering a familiar setting—the campus area—and being inspired by it. The result is this week-long exhibition with a total of seven installations situated around the campus area.

■ NOVEMBER 22

Thomas Norrby, Senior Extension Specialist at the Division of Rural Development, is appointed External Collaborator of the Year, for his long-time commitment to natural resource management and rural development.

■ NOVEMBER 30

Zeinab Nour-Eddine Tag-Eldeen receives her Associate Professor's (Docent) degree in urban and regional studies—planning and cross cultural development, at The Royal Institute of Technology (KTH). Her lecture is entitled: *Explore a New Dimension to the Long-standing Role of Planning in Risk Management*.

■ DECEMBER 8

Jenny Höckert defends her doctoral thesis in environmental communication: *Sharing lifeworlds and creating collaborative cultures: Challenges for the advisory system in order to contribute to a sustainable farm development*.

■ DECEMBER 14

Roger Elg, Lecturer in landscape architecture, is honored with the 2017 pedagogical prize from the Ultuna Student Union (ULS) "[...] for the enthusiasm he shows in our courses. He listens to see that everybody follows and makes sure that we have a broad knowledge base. His stories make us remember all the different plants, and he is always there to answer our questions when the Latin is driving us mad. His burning interest in plants has clearly contributed to our extreme nerdiness" (translated excerpt from the motivation text that is written in meter).

THOMAS NORRBY. A SELFIE IN A TWEET FROM THE SWEDISH RURAL PARLIAMENT HELD IN VISBY.

SUBJECT CHAIRS 2017

PATRICK SVENSSON,
AGRARIAN HISTORY.
PHOTO: JENNY
SVENNÅS-GILLNER.

AGRARIAN HISTORY

Agrarian history is a historical discipline that encompasses a development from ancient times to the present. The subject is about agricultural production and technological development, social and economic conditions, people in the rural society and their relation to nature, the landscape and society at large.

The focus is on research and education on northern European conditions, including Sweden, although a wider international agrarian history is also part of the subject. Research stretches from the Middle Ages to the 1900s with themes such as: Collective work and the organisation of the agrarian activities during early modern times; Medieval and pre-historic agrarian history with studies of production, land use and manorial systems; Livestock diseases in the 18th century and the society responds to them; Garden history, focusing on peasant gardens and a garden historical expose; Post-war agriculture.

MARIA IGNATIEVA,
LANDSCAPE
DESIGN.
PHOTO: MARIA
IGNATIEVA.

LANDSCAPE ARCHITECTURE

Landscape architecture is an environmental discipline focusing on man and our outdoor environment. Landscape architecture involves planning, designing and managing the landscape to create, maintain, protect, preserve and develop sites and areas to make them effective, aesthetically pleasing, as well as economically, ecologically and socially sustainable.

The research at the division aims to develop knowledge about the theory and methods of planning, design and land management. The researchers at this division work partly with the scientific foundation of landscape architecture (substantive theory), but also with its applications and methods (procedural theory).

ENVIRONMENTAL COMMUNICATION

The Division of Environmental Communication is a cross-section of researchers jointly devoted to examining communication pertaining to environmental issues.

We work closely with practice, including public agencies, organisations and industry, to inform processes of public participation on the sustainable use and management of natural resources; we critically discuss and challenge scholarly perspectives on conflict, power, democratic legitimacy and social learning in environmental management; and we relate the material contexts of natural resources to global processes of communication, exploring, for example, the role of social movements, democratic challenges and sustainability discourses on environmental policy, its legitimacy and its compliance.

LOTTEN WESTBERG,
TEMPORARY CHAIR
ENVIRONMENTAL
COMMUNICATION.
PHOTO: LOTTEN
WESTBERG.

RURAL DEVELOPMENT

The Division of Rural Development engages in international research, teaching and cooperation that contributes to scholarship, policy and practice in the Global North and South. Rural areas across the globe are under going rapid transformations caused by economic policies, climate and environmental change, and globalised food systems, among other processes.

Our research, teaching and cooperation engage with justice, knowledge and power in agriculture, forestry, development and environmental politics. We approach rural areas as dynamic material spaces made up of networks of relations that span between the rural and the urban, the Global North and South.

By bringing to bear social science questions of gender, race, class, territory, state formation, scale, policy and development we combat mainstream imaginations of the rural as residual, uninhabited, spaces for extraction and passive providers of food and natural resources.

Our strength lies in our commitment to probing how development processes unfold through interdisciplinary conceptualisations and participatory methodologies.

EDUCATION AT BASIC AND ADVANCED LEVEL

Within the main subjects: environmental science, landscape architecture and rural development

Full-time equivalent students 444

Supervised/examined bachelor's theses in: landscape architecture 36 rural development 20

Supervised/examined master's theses in: environmental science 19 landscape architecture 34 rural development 23

Programs

Agronomist—Rural Development, 5 years

Landscape Architect—Ultuna, 5 years

Environmental Communication and Management, international master's program, 2 years

Rural Development and Natural Resource Management, international master's program, 2 years

AWARDS AND SPECIAL ACHIEVEMENTS

SLU's Individual Pedagogical Prize 2017

Erica von Essen, Postdoktor at the Division of Environmental Communication.

Ultuna Student Union (ULS) pedagogical award 2017

Roger Elg, Doctoral Student and Lecturer at the Division of Landscape Architecture.

The Annual Theses' Scholarship of Uppsala Municipality

Cooperation as value creation for the local community in the global economy: Six corporations' role for the development of Vuollerim by Gustav Broms, student at the Agronomist—Rural Development program; Supervisor: Thomas Norrby.

Designing with an open storm water management in a residential courtyard and its nearby environment by Cecilia Nerman, Landscape Architect Student; Supervisor: Kerstin Nordin.

DOCTORAL EDUCATION

Within the subjects: agrarian history, environmental communication, landscape planning and rural development

Total number of active students 30

- in agrarian history 5

- in environmental communication 4

- in landscape planning 11

- in rural development 10

Number of doctoral dissertations 4

Number of licentiate theses presented 2

Number of admitted doctoral students 1

Number of admitted licentiate students 1

Number of 50% seminars held 3

Associate Professor's (Docent) Degrees

Jesper Larsson in agrarian history

Linley Chiwona-Karlton in rural development

Zeinab Tag-Eldeen in urban and regional studies

Lotten Westberg in environmental communication

THE RESEARCH SCHOOL SOCIETY, LANDSCAPE AND LAND USE (—2017-06-30)

Director of studies: Yvonne Gunnarsdotter, Senior Lecturer, Division of Rural Development

Courses

Scholarly writing, 7 credits. Course leader: Rolf Johansson, 14 participants (4 from Dept. of Urban and Rural Development), held in Tanzania within the capacity development program with Ardhi University, Dar es Salam.

Science and leadership for institutional transformations, 3 credits. Course leader: Rolf Johansson, 23 participants (3 from Dept. of Urban and Rural Development), held in Tanzania within the capacity development program with Ardhi University, Dar es Salam.

Analytical reading and writing, 6 credits. Course leader: Adam Pain, 7 participants.

New materialities and new worlds: The ontological politics of governing a changing planet. 5 credits.

Course leader: Andrea Nightingale, 7 participants.

Gender, development and natural resource management, 7,5 credits. Course leader: Seema Arora-Jonsson, 14 participants (5 from Dept. of Urban and Rural Development).

THE RESEARCH SCHOOL SOCIETY AND LANDSCAPE (2017-07-01—)

Director of studies: Camilla Eriksson, Reseacher, Division of Rural Development

Courses

Governance at the edge of the state: Political subjectivity and citizenship, 5 credits. Course leader: Andrea Nightingale, 18 participants (5 from Dept. of Urban and Rural Development).

Analytical reading and writing, 6 credits. Course leader: Adam Pain, 4 participants (2 from Dept. of Urban and Rural Development).

Postcolonial theory, 7 credits. Course leader: Seema Arora Jonsson, 6 participants (4 from Dept. of Urban and Rural Development).

Collaborations

SIDA financed capacity development program with Ardhi University, Dar es Salam, Tanzania.

The course *Governance at the edge of the state* was given as a NOVA course in collaboration with: The University of Helsinki, Norwegian University of Life Sciences (NMBU), University of Copenhagen, University of Zurich, University of Ghent & Roskilde University.

THE RESEARCH SCHOOL SOCIAL SCIENCE PERSPECTIVES ON SUSTAINABLE DEVELOPMENT (2017-07-01—)

A collaboration with the Department of Economics, SLU.

Director of studies: Nina Lind, Postdoctor, Department of Economics.

Activities

Annual PhD Student Workshop. Facilitator: Nina Lind, 12 participants (2 from Urban and Rural Development., 2 from Dept. of Work Science, Business Economics and Environmental Psychology, 8 from Dept. of Economics.

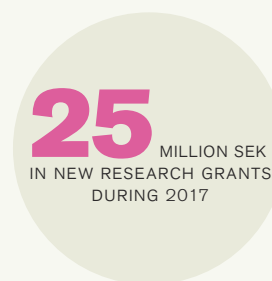

Career outside university, a one day seminar in collaboration with the research schools: Focus on Soils & Water, Organism Biology, Ecology basics and applications, Focus on Food & Biomaterials, 20 participants.

RESEARCH

ACTIVE PROJECT DURING 2017 (ORDERED BY SUBJECT, PROJECT LEADER)

New projects 2017

Agrarian History Åsa Ahrlund & Janken Myrdal	Swedish Garden History, set of Volumes Garden history, focusing on peasant gardens and a garden historical expose.	C F Lundströms stiftelse	2016-2019
Agrarian History Jesper Larsson	Cultural History Studies with a focus on Landscape and Settlement History The project studies self-managment and globalisation, rural land exploitation and settlement development during the 17 th century Northern Scandinavia.	The Royal Swedish Academy of Letters, History and Antiquities/ Vice-Chancellor, SLU	2015-2021
Agrarian History Clas Tollin	State owned forests within the culture reserve of Linnés Hammarby The project works with knowledge building around community use, commons or state owned forests in connection to Linnés Hammarby in Uppsala.	Uppsala County Government	2017-2017

Environmental Communication	Hanna Bergeå	Collaboration between Research and Counselling for the Development of Knowledge in the Green Sector The purpose of the project is to create a more efficient development of knowledge through methodological development around a national centre of excellence for counselling (KCR). Having developed and implemented new ways of collaboration between research and counselling, and connected the regional hubs into a national unit, the experiences made will be shared and the methods made available for other sectors in society. The project will also increase the possibilities to develop ideas around the green sector and make an impact in society. (Cooperation with SLU in Skara)	Sweden's Innovation Agency (Vinnova)	2015-2019
Environmental Communication	Lars Hallgren	Beyond Idealistic Glorifications and Categorical Rejections: The co-construction of meaning in dialogue practices in natural resource management The premise of this project is that consultation is a legitimate part of modern natural resource management but we need further understanding of how the communication in a consultation actually works in order to assess the conditions are required where they really contribute to the management in a relevant way, and how consultations should be designed to fulfill realistic goals and at the same time interest both organisers and participants. The objective of this project is to develop this foundation.	Swedish Research Council for Sustainable Development (Formas)	2017-2021
Environmental Communication	Sara Holmgren	How does Continuous Cover Forestry Used in Peri-Urban Forests Affect the Experiential Value of the Public? Qualitative och quantitative analysis The aim of the project is to chart and evaluate the continuous cover forestry used in frequently visited forests and to illustrate how these methods are experienced by local residents and visitors in peri-urban forest environments and furthermore to illustrate how these new methods can be combined with other forest management systems in peri-urban areas.	The Swedish Forest Society Foundation (Stiftelsen Skogssällskapet)	2016-2018
Environmental Communication	Sara Holmgren	Governing the Bioeconomy Transition: Actors, values and trade-offs The aim of this project is to investigate how different stakeholders in the Swedish forest sector perceive the bioeconomy transition, and how different bioeconomy pathways affect different stakeholders. Gaining this knowledge facilitates a more legitimate governing of the bioeconomy transition, where different forest values and interests are balanced in inclusive and transparent decision-making processes. (Cooperation with Linköping University)	Swedish Research Council for Sustainable Development (Formas)	2017-2020
Environmental Communication	Sara Holmgren	The Role and Responsibilities of the Municipalities in the Wording and Implementation of the Forest Policy: A study of the accountability of Swedish municipalities concerning the social value of forests and how this accountability in forest policies can be improved The project aims is to chart the work done by municipalities in peri-urban forests and thereby their contribution to the implementation of the forest policy, and furthermore to study the agency of the municipalities on a national level concerning the making of forest policy.	The Swedish Forest Society Foundation (Stiftelsen Skogssällskapet)	2016-2018
Environmental Communication	Sofie Joosse	Fish in the City: Possibilities for a Local Sustainable Food System for Fish The general aim of this research is to evaluate the (im)possibilities to socially organise local food systems. To this end I perform a comparative analysis of two case studies (Maine/New York and Uppland/Stockholm in Sweden) of locally based fish value-chains, i.e. fish produced and consumed within a limited area and outside of globalised production networks.	Swedish Research Council for Sustainable Development (Formas)	2016-2019
Environmental Communication	Helena Nordström Källström	Changing Animal Bodies: Breeding Responses to Environmental, Economic and Social Pressures Through three case studies, this project will explore how breeding strategies, technologies and practices offer indications of how farmers and farming respond to changing agricultural settings. The cases will be examining: 1) the changing economic circumstances of poultry production, 2) the contested politics of traditional breeds 3) the environmental pressures faced by pollinating insects. (Cooperation with Centre for Gender Research at Uppsala University)	Swedish Research Council for Sustainable Development (Formas)	2015-2018
Environmental Communication	Helena Nordström Källström	Increased Profitability through new Breeding Tools for Dairy Cattle The aim is to study the possibility to improve profitability on herd level in Swedish milk production by using sexed semen and genotyping heifers in the dairy herds and combine this with planned crossbreeding and use of beef semen. The results from the study can be used as a basis for advisory service for a more profitable milk production. (Cooperation with the Department of Animal Breeding and Genetics, SLU)	Swedish Farmers' Foundation for Agricultural Research (Stiftelsen lantbruksforskning)	2014-2018

Environmental Communication	Helena Nordström Källström	IT-Solutions for User Friendly IPM-Tools in Management of Leaf Spot Diseases in Cereals A Nordic-Baltic initiative to provide farmers with better models for predicting leaf spot diseases in wheat and barley, aiming for user-friendly, locally adapted IPM-tools. Improved management strategies, will contribute to increased food production, better economy for the growers and minimize negative impact on the environment. (Cooperation with the Department of Forest Mycology and Plant Pathology, SLU)	Swedish Research Council for Sustainable Development (Formas)	2017-2020
Environmental Communication	Helena Nordström Källström	Plant Protection for Sustainable Food Production Sustainable plant protection requires a common effort among all stakeholders, researchers and experts at authorities, in order to identify knowledge gaps and future research needs and to find new and innovative solutions for future challenges. We will conduct a synthesis over the state of art knowledge in plant protection, and the current implementation strategies available within Swedish agriculture. The aim is to identify knowledge gaps and differences between practice and current knowledge in risk management of plant pest and disease. (Cooperation with the Department of Forest Mycology and Plant Pathology, SLU)	Swedish Research Council for Sustainable Development (Formas)	2017-2019
Environmental Communication	Stina Powell	The Value of Stakeholder Participation in Collaborative Research Projects for Sustainable Development: A gender and intersectional analysis Applying gender and intersectional analysis, this research studies three sustainable development research projects ostensibly based on collaborative approaches. This research examines the collaborative objectives and methodologies of these projects. This will reveal insights into using collaborative research approaches to improve the design of future research projects and improve practical application.	Swedish Research Council for Sustainable Development (Formas)	2018-2021
Environmental Communication	Kaisa Raitio	Constructivity and Destructivity in NRM Conflicts: An analytical framework and methodology for understanding the role of communication and institutions in transforming conflicts This project assumes that disagreement as such is not destructive, and that conflict processes include both constructive and destructive aspects. Society needs to distinguish between them to maintain constructivity and reduce destructivity. The project seeks to improve the theoretical and pragmatic understanding on the role of conflicts in natural resource management (NRM).	Swedish Research Council for Sustainable Development (Formas)	2015-2018
Environmental Communication	Kaisa Raitio	Indigenous Rights and the Global Politics of Resource Extraction: The Case of Mining in Sapmi Over the last two decades there has been a growing global acknowledgement of Indigenous land and resource rights. At the same time, there has also been a dramatic increase in extractive activities and infrastructure projects on traditional Indigenous lands. This research project investigates the increasingly complex politics of resource extraction on traditional Indigenous lands emerging from these two contradictory trends. The project aims to identify practical proposals for the recognition of Saami rights to land and resources through legal reforms and through institutional models for the co-management of natural resources.	Swedish Research Council for Sustainable Development (Formas)	2013-2019
Environmental Communication	Lotten Westberg	Making Sense of Adaptation: The adaptation practice in a governance perspective This project investigates how and why Swedish climate adaptation is enacted in particular ways and how inherent governance struggles and choices are thereby handled.	Swedish Research Council for Sustainable Development (Formas)	2017-2021
Environmental Communication	Erica von Essen	What Makes Nordic Hunters Tick? Outlining the challenges facing the contemporary Nordic hunting ethic This 2-year postdoctoral research project explores the do's and don'ts and taboos that exist on wildlife harvesting and killing among modern Swedish hunters. The findings will be corroborated by equivalent studies on Danish, Norwegian and Finnish hunters. This to meet the principal aim of the research project, which is to identify a common Nordic hunting ethic.	NJ Faculty, SLU	2016-2018
Environmental Communication	Elin Ångman	VALKMAN: VALue and Knowledge based scenarios for sustainable Management of forest landscapes The overall objective of the research project is to integrate a set of tools and methods to a form a model for value and knowledge based guidance, planning and management of forest landscapes. The framework handles multiple ecosystem functions and services, as well as multiple species-habitat and biodiversity. (Cooperation with the Department of Forest Resource Management, SLU)	Swedish Environmental Protection Agency (Naturvårdsverket)	2016-2018

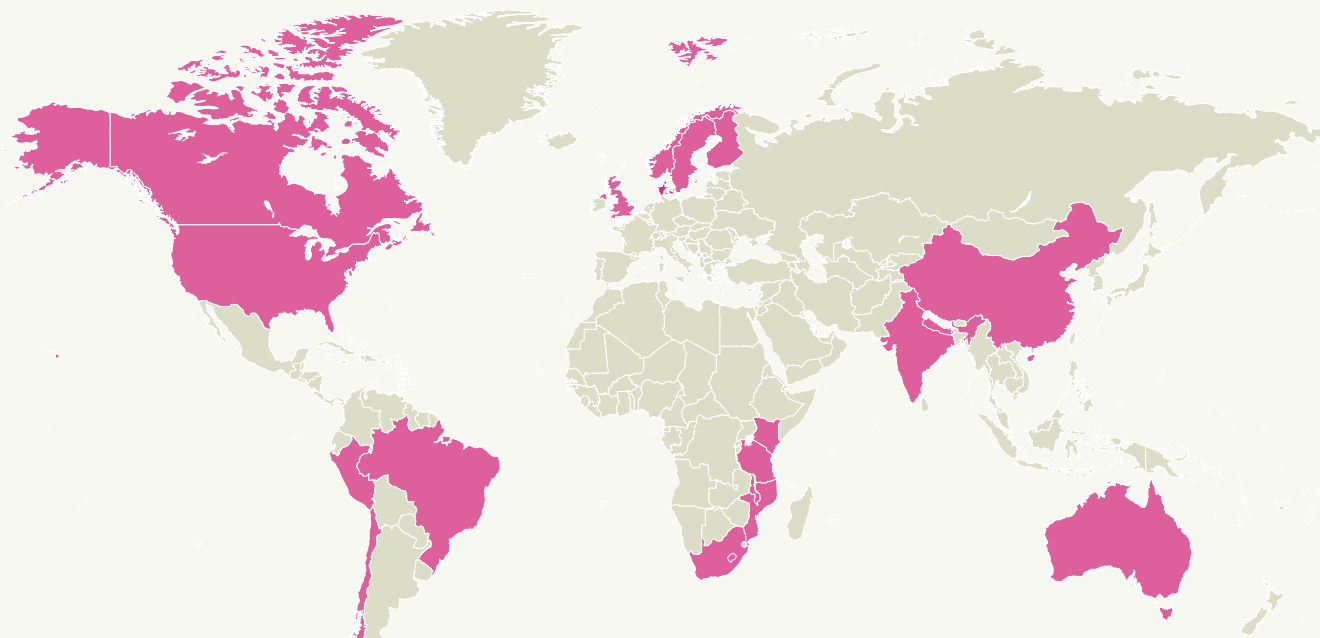

Landscape Architecture	Per G Berg	Vertical Densification: A functional densification urban challenge The project investigates seven UNHabitat-derived criteria for sustainable community development in high- versus low housing areas. It strives to test hypotheses on: disconnection with public life; critical thresholds in high-rises; biophysical limits for sun-, sky- and green space access; compatibility with a lean mobility lifestyle; construction- and maintenance costs; dwellers' living budgets and if high-rises ever can be justified or even attractive for future sustainable cities?	Swedish Research Council for Sustainable Development (Formas)	2017-2020
Landscape Architecture	Daniel Bergquist	Systems landscapes: A critical systems approach to urban sustainability (SysLa) The aim of this project is to critically analyze if sustainability ambitions in urban districts result in quantifiable progression towards overall resource efficiency. We will develop an interdisciplinary approach in which urban districts are conceived as systems landscapes (SysLa)—site specific, context dependent, though globally nested, social-ecological systems operating at multiple scales of society and environment. The approach will be applied in a comparative case study in an urban district explicitly aiming to be 'sustainable', in Uppsala, Sweden.	Swedish Research Council for Sustainable Development (Formas)	2016-2019
Landscape Architecture	Andrew Butler	Landscape up in Smoke: Revealing the changing landscape related identity among people who previously used the area in their daily lives The objective is to examine how landscape related identity, of those who recognise the present fire damaged area as their everyday landscape, has been affected by the fire. The study is using both quantitative and qualitative methods through surveys and interviews in order to get a picture of how the relationship to the forest have changed, in individuals as well as the society. (Collaboration with Department of Landscape Architecture, Planning and Management, SLU)	Swedish Research Council for Sustainable Development (Formas)	2015-2018
Landscape Architecture	Madeine Granvik	The Local Circular Food Chain: Incentive to sustainable development of society The aim of the project is to develop an operating model for making the local circular food chain an incentive to sustainable development of society; with an increased coordination of rural community services centered around service hubs and a wave of social innovations among producers and consumers. (Cooperation with Uppsala Municipality)	Sweden's Innovation Agency (Vinnova)	2016-2017
Landscape Architecture	Maria Ignatieva	Lawn as Ecological and Cultural Phenomenon: Search for sustainable lawns in Sweden The LAWN Project is researching the cultural and ecological phenomenon of lawns—the most common and popular feature of urban spaces around the world.	Swedish Research Council for Sustainable Development (Formas)	2013-2017
Landscape Architecture	Rolf Johansson	Strengthening Capacity on Research and Innovation for Sustainable Land and Environmental Management for Inclusive Development A capacity building research cooperation programme with Ardhi University in Tanzania. (Cooperation with the International Science Programme at Uppsala University)	Swedish International Development Cooperation Agency (Sida)	2015-2020
Landscape Architecture	Mari Kågström	DECODE: Community Design for Conflicting Desires The aim of the project is to develop a key part of urban development process steering, designed to be utilised within the framework of Citylab (a national forum for sharing knowledge around sustainable development) and freely by municipalities, developers, real-estate managers, with different pre-conditions. The project develops supporting planning processes based on cross-sectoral collaboration between different divisions within municipalities, private sector and academia, and where citizens and local actors engage actively. (Cooperation with Swedish Royal Institute of Technology, KTH)	Sweden's Innovation Agency (Vinnova)	2017-2019
Landscape Architecture	Susan Paget	Accessible Digital and Physical Playgrounds The project aims at creating and developing accessible outdoor playgrounds for children with disabilities. The project addresses the accessibility aspects from two different perspectives; by creating playground with high play value in their local environment and by developing playgrounds accessible for children with disabilities in a social context with other children. (Cooperation with the Swedish Royal Institute of Technology, KTH)	Sweden's Innovation Agency (Vinnova)	2017-2018
Landscape Architecture	Susan Paget	Digital and Physical Playgrounds (part 3) The aim of the project is to make outdoor playgrounds more attractive for children in their local environment through a concept called DigiPlayScape, that integrates digital techniques with green playgrounds in residential courtyards.	Sweden's Innovation Agency (Vinnova)	2016-2018

Landscape Architecture	Mattias Qviström	Reinterpreting Fitness Running: A topological study for healthy cities Fitness running plays an important role when it comes to public health, but the knowledge of the history and the planning that was required for adapting the cities to running is very poor. This makes it difficult to adapt the modern cities to increased everyday exercise. This project aims at contributing to knowledge of the history of fitness running, its movement pattern and geography, and to develop new methods for assessing the needs and requirements for fitness running.	Swedish Research Council for Sustainable Development (Formas)	2014-2018
Landscape Architecture	Mattias Qviström	Sustainable Leisure Mobilities in Compact Towns: Changing patterns of outdoor recreation in transit-oriented development (TOD) The project aims to acknowledge the history of the welfare planning and its current role for sustainable TODs, reveal the current use of places for active outdoor recreation of the TOD inhabitants, and explore the possibilities to encourage sustainable mobilities in (TODs), with special emphasis on green structure planning.	Swedish Research Council for Sustainable Development (Formas)	2017-2020
Landscape Architecture	Mattias Qviström	The Welfare Landscape Reassembled: Policies for sustainable outdoor recreation in times of urban densification The project studies the heritage of the welfare state, the welfare landscape, and how it's values can be secured in densification projects.	Swedish Research Council for Sustainable Development (Formas)	2016-2021
Landscape Architecture	Josefin Wangel	Design for a Socially Engaged Energy Efficiency in the Sustainable City The project investigates how the concept of energy efficiency can be further developed in relation to the everyday habits encouraged by the design of the built environment; how energy efficiency has been expressed in the past sustainability efforts and how these aspirations could be better implemented in future environments for sustainable habits in relation to the technical progress made possible. The project's interdisciplinary research team will produce concrete design proposals on objects and environments with a focus on the physical form that examines how people to a higher extent could be encouraged to live sustainably with a focus on how we produce, use and relate to energy in everyday life. (Cooperation with Swedish Royal Institute of Technology, KTH)	Swedish Energy Agency	2017-2020
Landscape Architecture	Josefin Wangel	Performance Indicators for Neighbourhood Sustainability Certification This project is part of the ongoing development of a Swedish certification system for sustainable neighborhoods, led by the Sweden Green Building Council (SGBC). The project aims to evaluate and refine principles for the certification system and to develop performance indicators. The performance indicators serve three purposes: 1) to assess the actual sustainability performance of a newly developed or refurbished neighborhood, 2) to provide a basis for elaborating what demands should be put on processes in the different phases of an urban development project, and 3) to monitor and/or assess the sustainability of already existing neighborhoods. (Cooperation with Swedish Royal Institute of Technology, KTH)	Swedish Research Council for Sustainable Development (Formas)	2015-2018
Landscape Architecture	Antoinette Wärnbäck	Energy-Efficient Logistics for Transportation of Soil and Rock Material in Södertörn The project aims to increase energy and resource efficiency in the management of soil and rock masses from heavy transport in the Södertörn region. The project will: 1) Explore the energy, environmental and economic potential of more efficient management and logistics, intermediate storage in material banks, more effective truck transports and use of waterway transports. This is carried out as a case study in Södertörn. 2) Describe policy instruments needed to achieve the gains in energy efficiency and 3) Propose business models for this. (Cooperation with Luleå University of Technology)	Swedish Energy Agency	2015-2018
Landscape Architecture	Antoinette Wärnbäck	The Applicability of the Environmental Objectives in Swedish EIA- and Permission Processes (MERIT) This project examines the Swedish County Administrative Boards in their monitoring of the joint impact on the environmental objectives made by individual activities. The purpose is to identify environmental quality objectives that could be attained by a proper handling in EIA- and permission processes, and by proposing improvements to the permission process in order to better contribute to the implementation of the environmental objectives. (Cooperation with the Swedish Environmental Research Institute, IVL)	Swedish Environmental Protection Agency (Naturvårdsverket)	2017-2020
Landscape Architecture	Petter Åkerblom	The Moving of Large Trees The aim of this project is to produce an instructional film, an overview of current knowledge and educational material on how to use modern techniques to move a tree that is blocking an excavation project to a new urban habitat.	Swedish Transport Administration	2017-2020

Rural Development	Seema Arora-Jonsson	Restructuring the Rural North? Tensions and prospects for sustainable development In the research we investigate how initiatives for intensified resource extraction are re-structuring rural spaces. We employ a cross national comparison of two cases of mining initiatives in Sweden and Canada that share several geographical, resource, economic and social characteristics, but differ markedly in terms of indigenous government.	Swedish Research Council for Sustainable Development (Formas)	2016-2019
Rural Development	Johanna Bergman Lodin	Evolving Gender Relations in Transforming Cassava Value Chains and Implications for Intrahousehold Nutrition and Health: The case of Tanzania The project focuses on evolving gender relations in households, communities and cassava value chains in light of the rapid commercialization and increasing higher value added processing of the crop in Tanzania, and generates strategies and options for improving outcomes.	Swedish Research Council for Sustainable Development (Formas)	2013-2018
Rural Development	Linley Chiwona Karlton	Urban Africa's Double Disease Burden and the Ameliorative Potential of Household Food Production This research will investigate whether and how emerging evidence from capital cities and larger cities of the developing world of a growing simultaneous double burden of malnutrition (diseases of both under-nutrition e.g. stunting or wasting, and those of over-nutrition e.g. obesity, diabetes, heart disease) have validity in the context of smaller but rapidly developing cities, and to assess a potential ameliorative role for urban agriculture (UA). (Cooperation with Umeå University)	Swedish Research Council for Sustainable Development (Formas)	2015-2018
Rural Development	Alexandre Dubois	Farming Futures in Borderline Communities of Sweden and Australia The project investigates how changing local climatic conditions and urbanisation affects the transformation of agriculture-community linkages (ACL) in small communities that are located on critical climatic 'lines'.	Swedish Research Council for Sustainable Development (Formas)	2018-2021
Rural Development	Camilla Eriksson	Can We Produce Food During Crises? Vulnerabilities and resilience at farm level in Swedish agriculture The rapid restructuring of agriculture has resulted in increased specialisation, mechanisation, new high-tech equipment and information technology that has created new vulnerabilities. Knowledge on how we would manage food supplies in times of crises is very limited in Sweden today. This project will contribute to filling that gap through focusing on what vulnerabilities and what resilience are to be found in Swedish food production.	Swedish Civil Contingencies Agency (MSB) / Future Agriculture, SLU	2015-2018
Rural Development	Camilla Eriksson	Changing Animal Bodies: Breeding responses to environmental, economic and social pressures Through three case studies, this project will explore how breeding strategies, technologies and practices offer indications of how farmers and farming respond to changing agricultural settings. The cases will be examining: 1) the changing economic circumstances of poultry production, 2) the contested politics of traditional breeds 3) the environmental pressures faced by pollinating insects. (Cooperation with Centre for Gender Research at Uppsala University)	Swedish Research Council for Sustainable Development (Formas)	2015-2018
Rural Development	Klara Fischer	Emerging Virus Infections in the Wildlife-Livestock-Human Interface The project aims at understanding the epidemiology and socioeconomic impact of peste des petits ruminants. International research cooperation within the Swedish Research Links programme. (Cooperation with Department of Clinical Sciences/Ruminant Medicine, SLU)	The Swedish Research Council (Vetenskapsrådet)	2015-2017
Rural Development	Klara Fischer	Researchers Perspective on Gene Technology Few subjects have been so debated as genetically modified organisms (GMO). Who has participated in this public discourse? And which arguments have dominated over time? This is what we want to find out, and we also want to know what impact the discourse have had on the legislation. One of two research project, where we study the public discourse on biotechnology, see project below: The Debate on GM-Feed in Sweden and Swedish Farmers. (Cooperation with Mistra BioTech, SLU)	The Swedish Foundation for Strategic Environmental Research (Mistra)	2017-2020
Rural Development	Klara Fischer	The Debate on GM-Feed in Sweden and Swedish Farmers Few subjects have been so debated as genetically modified organisms (GMO). Who has participated in this public discourse? And which arguments have dominated the discourse over time? This is what we want to find out, and we also want to know what impact the discourse have had on the legislation. One of two research project, where we study the public discourse on biotechnology, see project above: Researchers Perspective on Gene Technology. (Cooperation with Mistra BioTech, SLU)	The Swedish Foundation for Strategic Environmental Research (Mistra)	2017-2020

Rural Development	Flora Hajdu	Can Cash Transfers have Long-Term Effects on Rural Livelihoods in Poor Countries? The project aims to investigate potential differences in livelihood stability between households that have received child grant for most of the past 14 years and households that have not, in rural South Africa. The aim is to discuss whether small cash transfers can have long-lasting effects on livelihoods, or if they mainly have direct effects on poverty reduction.	Swedish Research Council for Sustainable Development (Formas)	2015-2018
Rural Development	Flora Hajdu	Social cash transfers, generational relations and youth poverty trajectories in rural Lesotho and Malawi The major recent innovation in policy responses to poverty in sub-Saharan Africa has been social cash transfer schemes (SCTs) which disburse cash to poor people. Few such programs have however been studied regarding their effects on youth and generational relations, considering that the cash is usually paid out to the elderly or those with children. This project does this through re-interviewing youth interviewed 10 years ago, looking at life trajectories. (Cooperation with Brunel University London, UK)	Economic and Social Research Council, Joint Fund for Poverty Alleviation Research (ESRC-DFID)	2015-2018
Rural Development	Andrea Nightingale	Conflict, Violence and Environmental Change: Investigating resource governance and legitimacy in transitional societies What produces conflict and violence in the face of environmental change? The aim of the project is to probe the concerns raised by environmental change for conflict and violence and to understand how we can respond more effectively to them. The outcome will be a concrete evaluation of how conflict and environmental change together create new vulnerabilities and points of empowerment for people and polities.	The Swedish Research Council (Vetenskapsrådet)	2016-2020
Rural Development	Andrea Nightingale	Landscapes of Democracy: Politics, subjectivity and ecologies in environmental governance Under what conditions does environmental governance become undermined by conflict and violence? The project pulls together 25 years of research in Nepal's forestry sector. An in-depth case study of gender and other social inequalities ('subjectivities'), everyday working of user-groups, role of the Forest Department and international organisations, and ecological change are brought together to address broader theoretical environmental governance questions of conflict, democracy and transformations of societies and ecologies.	The Swedish Foundation for Humanities and Social Sciences (Riksbankens jubileumsfond)	2017-2019
Rural Development	Andrea Nightingale	WEGO WEGO is a trans-national network that aims to develop a shared research and training agenda to educate the next generation of interdisciplinary social-environmental scientists on feminist political ecology in Europe. WEGO's research examines gender relations in community organising from a feminist-informed political ecology (FPE) framework. From an international and interdisciplinary perspective, WEGO looks at gender and power relations in community responses to the current climate, economic and environmental crises in different socio-ecological contexts.	European Commission (Horizon 2020)	2018-2021
Rural Development	Patrik Oskarsson	Coal Conflicts: Participatory resource governance for improved sustainability and conflict resolution in India and Mozambique The project explores the possibilities for a sustainable use of carbon through local resource management in two poor/poverty-stricken regions with major carbon assets, in the state of Jharkhand in East India and the Tete Province in northwestern Mozambique. Material collected during field work will be complemented with satellite data that will show changes in detailed land use related to coal mines.	Swedish Research Council for Sustainable Development (Formas)	2013-2018
Rural Development	Patrik Oskarsson	Participatory Environmentalism: Mobilising citizens for air pollution mitigation and improved environmental health in India This project examines the conditions which enable citizens to become actively engaged in pollution control for improved environmental health. It does this by enabling research participants to monitor household air pollution levels for a better understanding of local sources of pollution and personal exposure. The resulting improved knowledge of what pollution is and where it comes from is expected to support community mobilisation to mitigate pollution. The project is expected to add to our understanding of the factors which support citizens becoming active in pollution control and management activities.	Swedish Research Council for Sustainable Development (Formas)	2018-2021
Rural Development	Adam Pain	Access to Land Resources Vulnerability and HIV/AIDS in Tanzania A capacity building program, that intends to assess the contribution of the existing policies, instruments and legal frameworks on access, use and ownership rights on land resources by people living with HIV/AIDS in Tanzania.. (Cooperation with the International Science Programme at Uppsala University)	Swedish International Development Cooperation Agency (Sida)	2015-2020

Rural Development	Adam Pain	Forest and Agrarian Transition, Smallholder Practices and the New Forms of Land Governance: Building research collaboration among Brazil, Nepal and Peru This project will support an existing four country research partnership investigating issues of forest land governance. Joint activities include analytical workshops, field work and networking will be undertaken.	The Swedish Research Council (Vetenskapsrådet)	2018-2021
Rural Development	Adam Pain	Thinking Beyond REDD: Analysing smallholders' motivation and actions for ecosystem service management This research proposes to rethink how ES management and climate mitigation measures can be achieved. While approaching ES from a landscape perspective, we seek to investigate small-holders' motivations and actions for ES management and how these might promote forest cover maintenance, and other forms of ES provision at the same time as it meet the small-holders' livelihood needs. This will be investigated by using ethnographic and PRA methods in two contrasting country case studies, Brazil and Nepal.	The Swedish Research Council (Vetenskapsrådet)	2015-2018
Rural Development	Katarina Pettersson	Entrepreneurship as Empowerment? Gendered opportunities and challenges in entrepreneurial urban and peri-urban agriculture in Tanzania This project will develop our understanding of entrepreneurial urban and peri-urban agriculture (UPA) in Dar-es-Salaam, Tanzania and how it is gendered.	Swedish Research Council for Sustainable Development (Formas)	2018-2021
Rural Development	Katarina Pettersson	'Green care' on Farms in Sweden: A gender perspective on entrepreneurship in a changed welfare state The aim of the project is to increase the knowledge on green care entrepreneurship on farms in Sweden in a gender perspective. The research questions include: Why and how do people on farms perform green care? In what ways is are gendered divisions, symbols, identities, interactions and ownership, reproduced or challenged?	Swedish Research Council for Health, Working Life and Welfare (Forte)	2016-2019
Rural Development	Katarina Pettersson	Keys to a living country-side: Various forms of entrepreneurship in interaction with the surrounding environment The aim of the project is to develop new knowledge on the interaction between various forms of entrepreneurship and the surrounding country-side that influences the entrepreneurship developing there. (Cooperation with the Department of Economics, SLU)	The Kamprad Family Foundation for Entrepreneurship, Research and Charity	2017-2020
Rural Development	Katarina Pettersson	Women's Entrepreneurship: For a living country-side? Many of the new rural enterprises are owned and/or run by women. In order to stimulate rural development, more knowledge about the women's entrepreneurship is needed. Enterprising that remains invisible can neither be valued nor supported. This research project aims at making these women's enterprises visible. (Cooperation with Jönköping University)	The Kamprad Family Foundation for Entrepreneurship, Research and Charity	2018-2020
Rural Development	Erik Westholm	The Prospects for Swedish Farming: Agrarian change and household strategies The aim of this study is to explore agrarian change and farm household strategies in Sweden in order to better understand the current transformations in farming as a basis for a future oriented analysis. How do farmers respond to various challenges? Who will be farming in the future?	Swedish Research Council for Sustainable Development (Formas)	2016-2019
Rural Development	Erik Westholm	Turbulence in the Welfare State: The reception of refugees on the Swedish Country-side The Swedish country-side has undergone a demographic transformation during the last years. Through field studies the project explores how county organisations, municipalities and the civil society works in order to accommodate the arriving refugees. How are the established norms, practices and regulations affected by all the decisions made with a minimum of planning and coordination in order to solve urgent problems.	Swedish Research Council for Sustainable Development (Formas)	2016-2018
Rural Development	Erik Westholm	What does the future hold? Assessing the meaning of the long term in strategic and environmental research.	The Swedish Research Council (Vetenskapsrådet)	2014-2018

THE GEOGRAPHICAL DISTRIBUTION OF THE RESEARCH AT THE DEPARTMENT
ACTIVE PROJECTS DURING 2017

THE DEPARTMENT'S EXTERNAL COLLABORATION GROUP

ACTIVITIES

The Department's External Collaboration Group held a total of six meetings during the year. The SLU External Collaboration Coordinator Mariette Manktelow was invited to one of these. The group consisted of representatives from all divisions at the department.

Two breakfast meetings and one lunch seminar were held during the year:

September 28 Breakfast meeting with the theme: *Competence Training for Collaboration Leadership*.

Martin Westin, Division of Environmental Communication/SWEDESD and David Beskow from The Group for Sustainable Leadership in the Academia, informed about courses within the subject that are offered at SLU.

October 26 Breakfast meeting. Discussing the Collaboration concept set in a theoretical context. Lecture by Annette Löf, Division of Environmental Communication.

November 30 Lunch seminar co-hosted by Green Innovation Park and Erik Fahlbeck, Pro Vice-Chancellor at the University management. The seminar was held at the Green Innovation Park at Ultuna Campus. The theme was *Collaboration in practice: How can SLU increase its interaction with society in general and the green industry in particular?* Lecturers were Helene Oscarsson (Vreta Kluster) and Turid Sundin Carlsson, SLU Holding.
